SKILLS

React	JavaScript	Django	Python	Jest/Enzyme
HTML/SCSS/JSS	Material-UI	Framer Motion	TailwindCSS	HubSpot

WORK EXPERIENCE

Big Nerd Ranch — Web Development Intern | Duration: April 2021 - August 2021

- Developed a responsive, robust, test-driven React web application using REST APIs from the client server. Collaborated with fellow team members during peer review sessions.
- Identified continuous improvements in data quality, solutions, design reports and coding activities, presenting results to the stakeholders, team members and the clients.

Nyota PR — Research and Web Developer | Duration: February 2021 - April 2021

- Designed and developed the company's main website and integrated it with a live email servicing system for potential clients to connect.
- Conducted research on user behavior and usability to the application and made development decisions based on those findings with the client.

Protovo Solutions — Python Developer | Duration: September 2018 - November 2018

- Migrated the company's main website from PHP to Python using the Oscar framework.
- Built an Instagram bot using Python that auto likes and follows users to create engagements with an influencer who is the intended market for this project.

PROJECTS

Kazi — kazi-list.netlify.app

An intuitive hybrid site built using React and Django (Django Rest Framework) that enables the user to create daily tasks for their activities.

Forex Bot — github.com/Shavolski/Forex-Bot

An interactive bot that trades foreign currencies by using Simple Moving averages as its base strategy. Built using the power of Python and Oanda API.
